

## Edge Offshore Safety Harness with Life Jacket

### Offshore Safety Harness complete with Life Jacket

An ultra-light Edge Winx harness in combination with a life jacket.  
 The combination harness and life jacket are the ideal combination for safe working at height and above water. The life jacket has a minimum buoyancy of 300N.  
 The life jacket is fixed to the harness so that the combination can be easily put on like a jacket.  
 The life jacket is also available without a harness and can be easily attached/detached.  
 In addition, the harness has automatic aluminum closures and textile rings on the chest/back stitched with high-quality Cordura. The use of these materials makes the Edge Offshore corrosion-resistant.

The Edge Offshore is available in sizes: SM, ML, L-XL and XXL-XXXL.

Standard: EN361:2002 - Full body harness.  
 Standard: EN358:2000 -Belts for working positioning and fall prevention.
