

## Respiratory Protection Moldex half masks and full face masks

### MOLDEX Series 7000 half masks with interchangeable filters EasyLock®

Reliable protection against gases, vapours and particles.  
Simple filter installation process - no adapters needed. Low maintenance and durable.  
Series 7000 half masks can be combined with various EasyLock® gas and particulate filters, with no need for adapters or special pre-filters. For users, this means a high degree of flexibility and simple storage. Series 7000 masks are designed to be low maintenance: the cleaning process is easy and quick, as is the process for changing the small number of maintainable parts. Thanks to its lightweight design and soft materials, the Series 7000 offers a high degree of wearing comfort. An anatomically designed face seal ensures a comfortable and secure fit. The robust, durable mask body is available in hard wearing TPE material or temperature resistant silicone. EN140:1998 and Approval (EU) 2016/425.

### MOLDEX Series 9000 full face masks with interchangeable filters EasyLock®

Reliable protection against gases, vapours and particles.  
Large field of vision thanks to frameless panoramic lens.  
Simple filter installation process - no adapters needed. Low maintenance and durable.  
Series 9000 full face masks can be combined with various EasyLock® gas and particulate filters, with no need for adapters or special pre-filters. For users, this means a high degree of flexibility and simple storage. A frameless panoramic lens made from scratchproof, solvent-resistant polycarbonate protects the eyes and provides a large field of vision. An extra large head harness opening and two handy release clasps make it easy to put on and remove. The masks are designed to be low maintenance: the cleaning process is easy and quick, as is the process for changing the small number of maintainable parts. The anatomically designed face seal ensures a comfortable and secure fit. Moldex full face masks are hard wearing and fulfil the stringent requirements of Class 2. EN 136:1998 CL2 and Approval (EU) 2016/425.
