

WINTER 2024-2025

This year was very succesful. We reached again a higher market share with Wencon. Lighting becomes also a larger part of the business. Some great relighting projects are carried out. We are proud to be selected by 3 European manufacturers to become their distributor. In the last quarter, an office was opened in Switzerland to serve the Swiss market.

We thank all our relations for their trust and cooperation during 2024. The entire RMN Team wishes you and your family a Happy Christmas Holidays and a Prosperous and Healthy 2025 and look forward to see you back next year.

KIRA ACCULUX Handlamps and Flashlights

We can offer now the full range of KIRA Industrial and ATEX handlamps and flashlights.

WENCON MORE THAN ONLY A PRODUCT

WENCON NEW WEBSITE

Wencon refreshed it's entire website. A new look comes with a new logo. Find the benefits of Wencon Products and Wencon Repair Methods. The benefit of the entire metal-free range of products is huge. Tackle the risk of bimetallic corrosion with this product range. Extremely good resistant against seawater, chemicals and products for different temperature ranges. Good adhesion on all metals, concrete, wood, stone etc. The Wencon UW-Coating is a hit in repair of GRE-Pipes for scrubbers and ballast water. **This UW-Coating is now also available in a spray version.** Using the special pneumatic gun it can be sprayed, injected or applied with a special hollow brush. No manual mixing required, due to the design of cartridge and nozzle. For large applications is this an enormous time-saver. All Wencon Products holds Class Approval from DNV-GL, ABS, BV and RINA.

EXPERIENCE THE BENEFIT OF EASY LOGISTICS

Non-Dangerous Goods; the Wencon Products can be shipped as Non-dangerous Goods, offering flexibility and ease in transportation. Cost Saving Logistics.

RMN WENCON PARTNER TRAINING

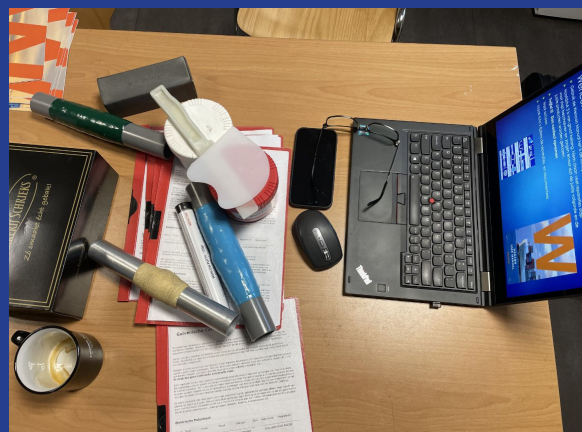

WENCON TRAINING

We went to RMN Service Partner Minderhoud Techniek and Minderhoud Maritime & Port Services for a Wencon Product training. The company Minderhoud Techniek is already many years a trusted partner for RMN and Minderhoud Maritime & Port Services will become a stock holder dealer for Wencon Products in the port of Vlissingen for their specific customers. We were asked to provide an additional to a number of new service engineers. It is important that the skills for epoxy based products and repair methods keeps on the right level. In half a day we went through the product range, metal deteriorations and how to recognize the differences in this and discussed the application methods.

This kind of training or seminar can also be given to the crew of your vessels or to the service and maintenance department of your factory. It helps to understand better what is possible with Wencon Products and for many it becomes very clear that those products are not only for emergency use but also for long lasting repairs and to protect expensive parts against, corrosion, wear etc.

**Prevent is better than renew.
Protect is better than renew.
Repair is often better than renew.**

Wencon to reduce CO2 emission for a better future of our planet.

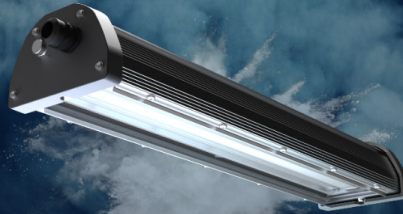

Wencon's Cost-Effective Advantage
Save time and costs with Wencon –
no metallic fillers in our epoxy product mean high specific volume
and no need for separate products for different metals.

WENCON®

JUKOLUX FINLAND

JUKOLUX
smarter light. better performance.

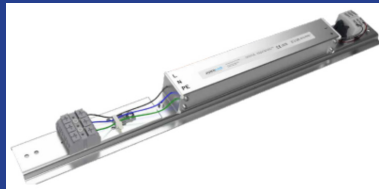

JUKOLUX and RMN Join Forces in international markets

October 2024 RMN became distributor for JUKOLUX FINLAND. With the high-end LED products from JUKOLUX the range that RMN can offer it's customers became bigger. JUKOLUX is founded in 2015 and is based in Vaasa Finland. The company is specialized in the development, production and marketing of specialized LED luminaires for difficult and harsh environments such as high temperatures and areas with a potential risk of explosion. The ATEX luminaires are ATEX and IECEx certified. For example the JUKOLUX ALX is a unique ATEX luminaire and is built upon pcs two component-certified modules. The benefit is that multiple product variations and possible updates are very easy to implement. JUKOLUX also designed a reset function if faulty situations do occur due to voltage/current spikes or thermal spikes. This ALX luminaires are suitable for use in Zone 1-21 and 2-22. The IIC classifications makes it possible to install the JUKOLUX ALX to all the gas environments, even the ones with hydrogen and other dangerous gasses. JUKO ALX is certified for gas environments IIA - IIB - IIC and for dusty environments IIIA - IIIB - IIIC. Protect against Optical Radiation Ex eb mb op IIC T6 Gb - Ex tb op is IIIC T85°C Db . JUKOLUX products comply with the requirements of the standard 60079-28 "protection against optical radiation".

JUKOLUX LED-4000Ex

Efficient, long lasting and reliable High lumen Output with robust structure and "op is" protection. JUKOLUX own LED Modules designed for ATEX environments. Component Certified.

JUKOLUX JUKO PU150Ex

Designed to work in all environments. Faulty situations can be reseted. Long lasting JUKOLUX own LED Driver for ATEX environments. Component Certified.

Experience this JUKOLUX and other high-end LED products.

KIRA LEUCHTEN GMBH GERMANY

KIRA DISTRIBUTOR FOR THE NETHERLANDS & SWITZERLAND

Since November RMN is distributor for KIRA Leuchten the Netherlands and Switzerland. KIRA is a family owned manufacturer in electrical products since 1949. The company has an extensive know-how and enjoy a first-class reputation as a reliable partner in multiple countries. Thanks to the many years of experience in the field of technical lighting for industry and trade, they can offer precise and individually manufactured solutions of the highest quality. The company is DIN EN ISO 9001 and Explosion-proof standard RL2014/34/EU Certified.

KIRA RANGE OF PRODUCTS

KIRA offers a wide range of LED lighting products as Ex-LED lights for Zones 0/1/2/21/22, LED Hand-lamps for industry and crafts, LED Tubular lights for industrial machines, LED Lights with a 360° illumination, LED lamps for the workplace, LED Mobile Floodlights, LED Hand lamps and Flashlights, Ex Signal Lamps and a full range of accessories for the KIRA lamps. In 2011 KIRA LEUCHTEN acquired their long-time supplier company "Peter Geist Electronic" manufacturer of several electronic devices as electronic ballasts. With this the company is able to offer customized self-ballasted lamps on request.

The KIRA Hand Lamps with Ex-protection comes standard with 10m cable but can optionally be supplied with multiple cable lengths up to 30m. There are LED Hand Lamps available in voltage range 230V, 110V, 42V, 24V & 12V for ATEX Ex Zones 1/2/21/22 in protection class II and III.

Visit our website or contact your RMN lighting specialist for all possibilities and requests.

DIANA ELECTRONIC

DIANNA
PASSION FOR LIGHT

LED masterpieces:
Quality, variety and
innovation combined in
every commercial LED light

DISTRIBUTION OF DIANA LIGHT LED BY RMN

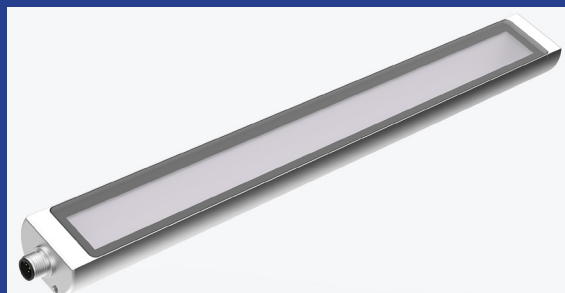

In October 2024 RMN became distributor for DIANA LIGHT LED products in the Netherlands and Switzerland. DIANA LIGHT develop, produce and market a range of LED products with unlimited possibilities. The range of products consists more than 70 product series in several variants, each multiplied by optional choices of material, color, power, size, beam angle and many more. The company is able to develop a solution for your requirements. All products are 100% made in Germany.

The range of products consist of Light Bars, Surface Mounted Lights, Recessed Lights, Joint Head Lights, Gooseneck Lights, Inspection Glass Lights, Signal Towers, Ring Lights for Camera's and many more, together with a large range of accessories and power supplies.

The lights works on safety voltage mainly 22-28VDC. Power supplies and special connection cables are in several types available. Industrial light fixtures are resistant to most common coolants and lubricants, are extremely resilient and are an optimal combination of brightness, performance, design & protection class. These light fixtures are UL Listed as low voltage luminaire E503650.

NEW SURFACE-MOUNTED LIGHT Q40

Three functional variants in six lengths. Homogeneous and large-area illumination. Light output configurable. Soft On/Off feature. Extremely resilient. Glare-free. Lifespan of >60.000 hours. Extremely robust and durable for demanding environments with an IP67 rating. With the "Dimming" variant the brightness can be continuously adjusted. With the "Control" variant configuration via the smart-BOX is also optionally for 5 light output levels, eco mode and the soft on/off feature. Glare-free, 100% flicker-free light even when dimmed. Illumination without multiple shadows. This lamp is ideal for workplaces that rely on high-quality fatigue-free lighting conditions. Available from 8W up to 48W (1200lm up to 7200lm).

RELIGHTING PROJECTS WITH LED

RMN RELIGHTING FROM CONVENTIONAL TO LED

RMN is well known for its large range of LED products from different European manufacturers. To combine the product ranges of these manufacturers we are able to offer any solution to meet the customers requirements. We can offer a one-to-one relighting conversion but are also able to make with our manufacturer partners a detailed light calculation. Relighting projects can be done in all kind of industries and office buildings. Light fixtures we offer can be used in Maritime environments as marine and offshore, industrial plants, infra, office buildings, hospitals, clean-rooms, port areas and logistic areas, warehouses, greenhouses, ATEX environments, high temperature environments and so on. The products we offer are developed and produced by first-class European manufacturers. All products comes with a full factory warrantee on the complete luminaire.

The lighting is characterised by a long lifespan, high quality, robustness, low glare and a very favourable energy consumption. Important is that industrial as well office lighting products are flicker-free and have a low glare factor. This makes your environment safe and takes care for fatigue-free lighting conditions.

Do you have a relighting project small or large contact our lighting specialists for the possibilities
