

Swiss Solutions Worklight Solutions

37.500 Lumen over 25 mtr. = 1,500 lumen per meter

Swiss Solutions product Development

One of the latest developments in fast removable worklights is the Flexible LED. A very flexible product with a high light output and a unique 240° (2x120°) light angle.

What is Swiss Solutions Flexible LED

Flexible LED Strip for illumination on both sides. Energy saving alternative for temporary illumination of work side. No shadows which is a big benefit in compare to spot lights. The Flexible Led can easily be installed to ceilings, walls, stairways etc. and provides an optimum illumination. Installation is fast and easy what is a huge benefit using temporary illumination. The LED strip is covered by a high performance, durable, clear, flexible PVC tube. This provides the user more flexibility and a higher light output. The Flexible LED is IP65 and can be used indoor and outdoor as well. The Flexible LED is 25 meter and comes ready for use on a cable reel with 1.5 meter connection cable with Euro plug. The Flexible LED can be extended up to max. 100 meter.

Technical features of the Flexible LED

LED: LED's double sided 2 x 180 LED's per meter length.
System power: 325 Watt per 25 meter, (13W/m).
Light efficiency: **1,500 lm/m. (25 meter total 37.500 lm).**
Light color: 4.000K
Light angle: 240° (120° on both sides).
Estimated useful life superior to >30.000 hour.
Protection: IP65 and impact resistant IK08
Ambient temperatures: -25°C - +55°C.
Weight: 6 kg.
Dimensions 16 x 8 mm (WxH).
Length: 25 meter, extendable up to 100 meter.
Connection cable: 1.5 meter with Euro plug.
